i am requesting the FCC to reject the NBA's petition 04-160. I support XM's ability to provide instant Traffic and Weather reports. I believe we should have freedom of choice on what we listen to since we do pay to listen to XM's radio broadcast. the local radio stations do not provide enough traffic and weather reports when they are needed. if your profession puts you on the road 24/7 you need to be able to obtain a traffic report instantly ,without having to wait for the local radio stations to finally broadcast what you need. please consider rejecting this petition for the respect of the public. i believe it should be our choice to listen to what we want to or if we choose not to listen. it is not right for the FCC to tell us what we can or cant listen to.
